HTML5 CSS3 JavaScript Ruby on Rails PHP mySQL jQuery JSON

WORK EXPERIENCE

Web Application Developer Consultant

Feb 2016 - March 2016

San Jose

 Developed the website and User login and authentication system for the client's web product. My work involved designing,developing and integrating the client's web product to a website that helps manage user sessions and authenticate and manage user roles.

Front-End and SEO Consultant

2015 - 2016

Sunnyvale

 Improved the client's website by moving it to HTML5 and CSS3, adding social media and improving it's functionality. Optimized the site for Search Engines (SEO) and made it responsive.

Software Developer

2014 - 2015

Sunnyvale

 Worked on a web product in Ruby on Rails, javascript, jQuery, AJAX using Git source control and deployed it on Heroku.

Software Engineer

2004 - 2006

Oakland

 Develop, deploy and maintain web multiple web products varying from real estate, ecommerce to business.

Software Intern

2003

Mountain View

 Tested and made queries on their application that processed STAR test results.

PROJECTS

MapMyVideo ()
feb 2016 - April 2016
Developing the website and User login and authentication system for the client's web product. My work involves designing,developing and integrating the client's web product to a website that helps manage user sessions and authenticate and manage user roles.

Foamlinx (http://www.foamlinx.com)
2015 - early2016
Improved the client's website by moving it to HTML5 and CSS and adding social media and improving it's functionality. Optimized the site for Search Engines (SEO) and made the site responsive.

Agencylogic, NetworkEarth ()
2004 - 2006
AgencyLogic PowerSites are listing tool available for Real Estate professionals, every prospect receives a 100% unique Web address representing their specific property. ● Enhanced the administration and client site developed using ASP.net, C#, ADO.net and SQL Server 2000 ● Developing UI in ASP.Net using Web Forms.● Used ADO.NET, SQL provider, DataSets, DataList and DataRepeaters to establish database connectivity, data manipulation and display data.● Wrote the stored procedures in SQL Server involved in data base access.● Created libraries and user controls ● Performed image manipulation tasks.● Automated the process of registering domain names for the new powersites, now the sites get live within 2 hours of their creations.

Chamber Business Suite, NetworkEarth
2004 - 2006
Chamber Business Suite provides system integration services for the Chamber Business Suite. Features I worked on include the Event Calendar, member directory and registration system.● Developed web interfaces using ASP.net Web Forms, User Controls, and C#.● Developed and worked with APIs, Data Model, Data Entities and Data Adapters.● Created Views to extract data from sql server

SteamingBean (Retail Coffee), NetworkEarth (http://www.thebean.com)
2004 - 2006
Designed and developed the administrative site using ASP.net, C#, ADO.net and SQL Server 2000 www.thebean.com/components/administrationwebsite ● Overtook the project and was responsible for further enhancements ● Developing UI in ASP.Net using Web Forms.● Used ADO.NET, SQL provider, DataSets, DataList and DataRepeaters to establish database connectivity, data manipulation and display data.● Wrote the stored procedures in SQL Server involved in data base access.SerendipiTea (Retail Tea)www.serendipitea.com Using the common objects (by inheriting them) from the ecommerce project I worked on new site for tea.
